EXPERIENCE

MERN E-commerce
https://creaciones-de-colores.herokuapp.com/

First full stack project in which I learned to integrate Redux with React, where I connected the client with the server that was built with Node and Express.

MERN Social-Media
https://social-media-smpl.herokuapp.com/

Full stack project, where I learned how to upload photos to Cloudinary from the backend and store them in a cloud, as well as applied scss in the style of the project.

Pokemon API
https://github.com/charlyfinos/pokemon-api

Simple project where I make calls to an api where I make tests based on TDD (Test Driven Development) where I use Mocks in Jest for the calls.

Memory-Card Game:
https://memory-card-game-1.herokuapp.com/

Memory game made with React and React-Bootstrap where the cards are shuffled every time the user clicks on them. The game ends when the user clicks twice on the same card.
